- **BA – Integrated Marketing Communication, Hood College, Frederick, Maryland (2018)**
- **Data Analysis and Visualization:** Python • PostgreSQL • MS Excel • Jupyter Notebook
- **Web Development:** HTML • CSS • JavaScript • Bootstrap
- **Other Skills:** bash, Git, GNU Image Manipulation Program (GIMP)

PROJECTS

To Impossible and Beyond: Consumer Sentiment Analysis of Plant-Based Patties

- Explored consumer sentiment on Twitter regarding the Impossible Burger and Beyond Burger
- Scraped 40,000 tweets for each brand and imported datasets to PostgreSQL
- Performed rule-based sentiment analysis on tweets to create training set for topic modeling ML algorithm
- Created word clouds of tweets with positive sentiment and negative sentiment
- Extracted hashtags with positive sentiment and negative sentiment and sorted by frequency of use

Lyrical Visualization and Analysis: Taylor Swift

- Visually modeled the lyrics of Swift's nine main studio albums in word clouds
- Analyzed Swift's lyrics to determine lyrical and thematic consistencies and changes throughout her career
- Performed rule-based sentiment analysis on the lyrics to determine the sentiment (positive, neutral, negative) of each song and album
